

Iceland

Day of arrival:

We flew from Prague airport to Riga and than to Iceland. On Keflavik airport we were waiting for other students. Than we went by bus to Akureyri. We arrived at midnight.

Sunday:

We spent this day with families. First we had a look on Icelandic horses. After that we went to Christmas House. Than we went to café in cow stable. In the evening had an amazing dinner.

Monday:

We spent morning in Akureyri high school doing some "icebreaking" activities. That was fun. Than we went back to elementary school and learnt something new about brownfields. Rest of the day we were cooking with other students at the school and then went back home.

Tuesday:

Our day started at the city hall. We learnt something new about Icelandic brownfields. Then we went to school and there was a presentation about how to take a pictures with your camera. In the afternoon we had some free time, so I went to nearby waterfall. It was amazing.

Wednesday:

This was probably the best day. We went by bus to lake Myvatn. First we went there to lava fields, it looked there like in forest made of lava. Then we went to Hverir. There steam was coming from ground. It looked really good. And after that we climbed to the top of the extinct volcano. It was the best of whole day. On the top it was windy and cold. Who wouldn't love it. We returned late in the evening.

Thursday:

Morning we spent at school learning about eTwinning. We created our accounts and than Slovenia teacher showed us some basic functions. And than we learnt how to use pic collage. In the afternoon we had free time, so I went with my classmates to have a look around Akureyri. But it was raining a lot so we had to go back home. Then we went to Akureyri swimming pool. In the evening we had a dinner with almost all the students in Erasmus.

Friday:

In the morning we were learning something more about eTwinning. Then we prepared some presentation about our work on brownfields. Only us and slovinans were presentating. We were also presentating about our week on Iceland. In the afternoon me and two others students jumped in the sea. It was cold but very refreshing. Than we went to grab an ice cream. In the evening was a bal. But I was tired so I left early.

Saturday:

We left early in the morning. We went by bus to Rejkjavik. There we spent three hours just walking around the center. Then we took taxi and ride to Keflavik airport. We flew to Oslo and than to Praga.

It was really this experience. I'm glad I joined in this project. And I hope there will by more events like this.
